If you haven't heard, SIP Trunking is now helping small to mid-sized businesses significantly save on their monthly phone bill while seamlessly connecting remote workers and delivering real-time communications applications.

For years, large companies have been benefiting from SIP (Session Initiated Protocol) Trunks. Now there's a scalable option for your small to mid-sized business.

It's priced to give you real ROI, set up to seamlessly connect remote workers and has the capacity to deliver real-time communications applications without clogging up your network. Plus, SIP Trunks expand the boundaries of your business by allowing you to choose local numbers anywhere.

Benefits:

- Monthly savings from day one
- No guesswork – You can do the math. Just compare your known monthly charges to your planned SIP Trunking costs
- Appear to be local, even if your office isn't
- Long-term growth capability
- Flexibility in line usage
- Optimizes bandwidth

All You Need:

1. A SIP Service Provider (we have one in mind)
2. A Telephone System that is compatible with, and enabled for SIP like the Samsung OfficeServ 7000 Series
3. SIP Trunks
4. **And US – your single point of contact** to evaluate, recommend, install, service and manage your new network and phone system
